Civil Service

Civil Service IT professionals, manage, supervise, lead, administer, develop, deliver, and support information technology systems and services from right here in the United States. Areas of focus are policy and planning, enterprise architecture, security, systems analysis, applications software, operating systems, network services, data management, internet, systems administration, and customer support.

Foreign Service

Diplomatic Technology Officers serve key roles in U.S. embassies and consulates overseas by applying technology solutions to the business of diplomacy. Apply your IT skills in an ever changing and challenging environment centered around system administration, cybersecurity, business analytics, network engineering, and project management. You will also perform mission-critical activities, such as assisting special diplomatic events and high-level official visits by the Secretary of State and President of the United States.
